

DÜMMEN
ORANGE®

Succulents

2022
2023

A word from our CEO

We are excited to present you with the newest edition of the Dümmen Orange catalogue. Looking through this portfolio makes me proud to see such a broad range of high-quality succulents. Beautiful varieties that are produced with care and delivered to our customers worldwide by a passionate team of more than 7,000 colleagues, who are all fully committed to your success.

Dümmen Orange is a global market leader in floriculture breeding and propagation. Our Breeding Technology Centre in the Netherlands, opened in 2020, is the largest floricultural laboratory in the world. With revolutionary genetics and breeding technology, our breeders and scientists continuously develop more beautiful products and next generation varieties in smarter ways. We ensure growers, retailers and consumers sustainable products by increasing the natural resistance of our flowers and plants, to create stronger products and reduce the need for chemicals significantly.

Our innovation goes beyond breeding and propagation. Within our company innovation, production and service go hand in hand. As we focus on continuous improvement, we are also accelerating our business's digitalization. We are communicating more online than ever before. Therefore, we develop new digital tools to offer you all the information and services you require. Most important is that we keep our personal relationships tight. We remain committed to delivering you the best products, in the right place and at the right time.

I am excited about all innovative developments within Dümmen Orange. I believe it will help us offer you the best products and services possible to help your business grow.

Best regards,

Hugo Noordhoek Hegt
CEO Dümmen Orange

SUCCULENT PRODUCTION CYCLE

HOW OUR PRODUCT LIFE CYCLE WORKS

To produce the best succulent cuttings for your business and market, Dümmen Orange works closely with dedicated production farms to align on cutting specifications, packaging and labelling. The cornerstones of quality cutting supply are our four farms.

GUATEMALA & COSTA RICA

Antigua Flowers, Guatemala – This Dümmen Orange-owned farm is located close to the ancient city of Antigua and produces mainly Echeveria, Gasteria and Haworthia.

Floramo, Costa Rica – Just an hour from the city of San Jose, this farm produces mainly Echeveria cuttings. The local climate guarantees healthy and strong vegetative cuttings.

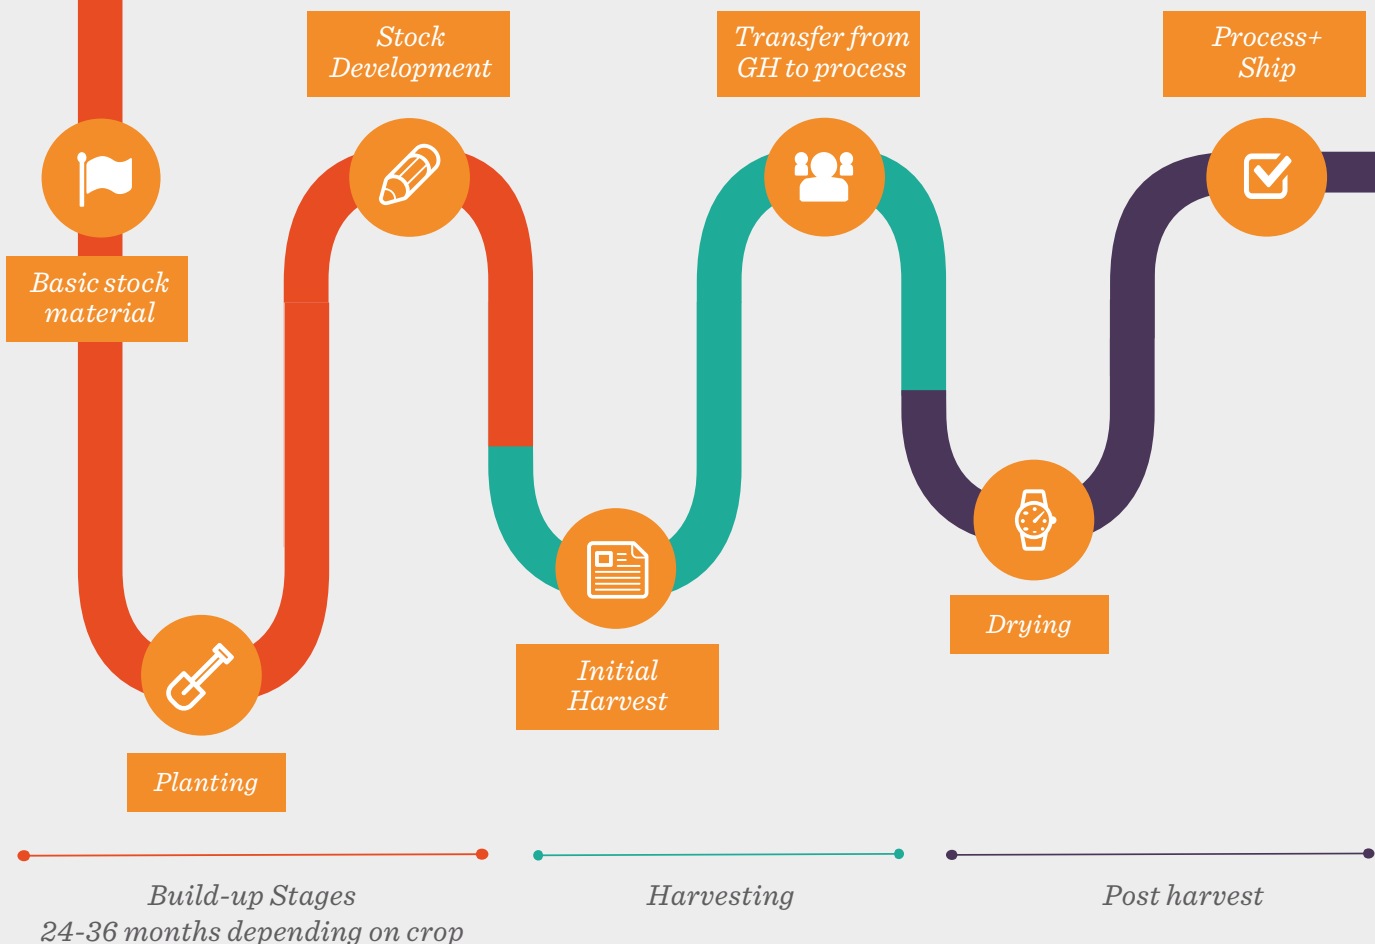

ZIMBABWE

Zimflora, Zimbabwe – Producer of a very wide and diverse assortment including Aloe, Crassula, Echeveria, Haworthia and Gasteria. The dry and consistent climate, as well as ideal production infrastructure, ensures sturdy, compact and colourful cuttings.

INDONESIA

Florion, Indonesia – On the island of Java, Indonesia, the company produces Dümmen Orange's Euphorbia milii, Tradescantia 'Nanouk' and Saintpaulia products.
