passion for People, passion for plants

We believe our passion for pot roses, garden roses and garden plants is worth sharing! This is why we enjoy devoting our every day to ensuring that you and your customers, wherever you are, can derive even longer and more intense enjoyment from our beautiful plants.

We produce our plants year round within a 'closed cultivation system,' which means that we protect them as much as possible through the application of organic growing methods. We devote maximum attention to environmentally responsible

propagation in order to supply products of excellent quality that also address the issue of sustainability. As a family business we are continuously involved in innovation. We work with the Danish plant breeding company Poulsen Roser A/S on the further development and improvement of our range of pot roses, garden roses and Clematis.

We are furthermore also committed to investing in advanced cultivation technologies in order to provide excellent product quality in combination with the highest possible level of service!

Nolina Gärtnereien

Unsere Leidenschaft für Topfrosen, Gartenrosen und Gartenpflanzen teilen wir gern mit der ganzen Welt! Aus diesem Grund setzen wir uns täglich mit viel Begeisterung und Energie dafür ein, dass Sie und Ihre Kunden unsere schönen Pflanzen noch länger und intensiver genießen können.

Wir kultivieren Rosen das ganze Jahr über in einem „geschlossenen Kultursystem“, das bedeutet, dass wir unsere Pflanzen möglichst auf biologische Art und Weise schützen. Wir widmen uns mit maximaler Sorgfalt einer umweltschonenden Kultur, um so qualitativ hochwertige “grüne” Produkte liefern zu können.

Als Familienbetrieb befassen wir uns kontinuierlich mit weiteren Innovationen. Wir arbeiten mit dem dänischen Züchter Poulsen Roser A/S an weiterführenden Neuerungen im Sortiment und – an der Verbesserung unserer Topf- und Gartenrosen und Clematis. Darüber hinaus ist unser Interesse stark auf die technische und kulturtechnische Weiterentwicklung ausgerichtet. Dadurch sind wir in der Lage eine sehr hohe und konstante Produktqualität zu erzielen kombiniert mit maximalem Service!

Pépinières Nolina

Nous communiquons volontiers au monde entier notre passion pour les rosiers de jardin et en pot et les plantes de jardin ! C'est pourquoi nous nous impliquons chaque jour avec beaucoup d'enthousiasme et d'énergie pour vous faire profiter, ainsi que vos clients, de nos magnifiques plantes, plus longtemps et plus intensément.

Nous produisons toute l'année selon un système de culture fermé, ce qui signifie que nous protégeons le plus possible nos espèces de façon biologique. Nous consacrons une attention maximale à la culture écologique et pouvons ainsi fournir des produits “verts” de qualité supérieure.

Au sein de notre entreprise familiale, nous sommes en permanence axés sur le renouvellement. Nous travaillons avec l'obteneur danois Poulsen Roser A/S à un renouvellement avancé de l'assortiment et à l'amélioration de nos rosiers en pot et de jardin, ainsi que de nos clématites. Par ailleurs, nous consacrons également une grande attention aux évolutions techniques et culturelles. Nous réalisons ainsi une qualité de produit constante et particulièrement élevée, avec un service maximal !

Vivai Nolina

Il nostro lavoro è alimentato da un'immensa passione per le piante da giardino e le rose, tanto da vaso quanto da giardino, e condividiamo volentieri tale sentimento. Lavoriamo quindi ogni giorno con grande entusiasmo, affinché lei e i suoi clienti possano godere ancora più a lungo ed intensamente di piante straordinarie.

Praticiamo la coltivazione a “ciclo chiuso” lungo tutto l'arco dell'anno. Ciò significa che per la protezione delle piante facciamo il più possibile ricorso a metodi di lotta biologica e prestiamo grande attenzione all'ambiente e alla sostenibilità delle nostre attività. Il risultato sono prodotti “verdi” di altissima qualità.

La nostra è un'azienda a conduzione familiare, alla ricerca continua dell'innovazione. Grazie alla collaborazione con l'azienda danese Poulsen Roser A/S, specializzata nel settore della ricerca genetica, siamo in grado di ampliare e migliorare continuamente l'attuale assortimento delle rose da vaso e da giardino, e delle clematidi. Seguiamo inoltre con grande interesse gli sviluppi nel campo della tecnica e delle tecniche colturali. Solo così possiamo garantire prodotti di qualità elevata e costante, oltre ad un servizio senza pari!

Питомник Nolina

В нашем цветководческом питомнике мы с удовольствием делимся со всем миром любовью как к горшечным и садовым розам, так и к другим садовым культурам! Мы ежедневно работаем над тем, чтобы наши цветы как можно дольше приносили максимальное удовольствие их новым владельцам.

Растения в нашем хозяйстве круглый год растут «в закрытой системе», подразумевающей минимальное использование защитных химических средств. Мы уделяем максимальное внимание экологически ответственным технологиям выращивания, позволяющим получать высококачественный «зеленый» продукт.

Мы – семейное предприятие, постоянно работающее над усовершенствованием свойств наших растений и их сортовым разнообразием. Сотрудничество с датской селекционной компанией «Poulsen Roser A/S» дает нам возможность существенно обновлять наш ассортимент горшечных и садовых роз, а также клематисов. Кроме этого, мы постоянно работаем над улучшением технологий выращивания и применяемого в производстве оборудования. Плоды наших усилий – неизменно высокое качество наших растений и максимально высокий уровень обслуживания!

Love the Scent of Roses

The Parade® for Garden Collection

Parade® roses are richly flowering varieties with large buds, and fully double blooms. Several varieties are fragrant. Their leaves are healthy and green from the bottom all the way to the top of the plant. Parade® for Garden Collection roses can be used as a solitary plant or planted in small groups in a basket for either outdoors or in a conservatory, on the patio or planted in flower borders.

Easy and quick cultivation process

A delivery time of at least 15 weeks should be considered.

Strong
compact roses
flowering
bouquets

The Towne & Country® Collection

The most awarded dense, compact growing landscaping roses in the world. Their flowers contain a large amount of nectar. Some of the varieties produce rose hips in beautiful colours. Flowering continues throughout the season. Plants are very healthy, hardy and robust and will quickly reach a good size. Suitable as hedge or ground cover in large flower beds that need to give an impression of uniformity in gardens and parks, or on verges.

Easy and quick cultivation process

A delivery time of at least 15 weeks should be considered.

Landscape
roses
for gardens
& parks

The Palace® for Garden Collection

Bushy and compact growing varieties with large, fully double and often fragrant blooms. Varieties of The Palace® for Garden Collection flower incessantly throughout the entire summer. Palace® roses are perfectly suitable for eye-catching container plantings or for ornamentally arranging in a bowl. They also can be used as a single plant in a fancy pot. Their attractive blooms on sturdy stems makes them also beautiful cut flowers.

Easy and quick cultivation process

Delivery time of at least 15 weeks should be considered.

Bushy and
compact roses

The Castle® Collection

Modern compact and bushy bouquet roses with a wealth of flowers. The attractive blooms have the old-fashioned antique look and most varieties are fragrant. The leaves are dark green and healthy and the plant flowers continuously throughout the season. All varieties are extremely healthy and hardy. The roses do not require very much space. This means that they are suitable for containers on the patio and for in flower borders.

Easy and quick cultivation process

A delivery time of at least 15 weeks should be considered.

Roses with an
intense perfumed
fragrance

“Strong quality,
vivid colours,
huge flowers”

The National Parks® & Paramount® Collection

The National Parks® and The Paramount® Collection roses have large, scented, semi double flowers. All National Parks® varieties have a wealth of flowers and a very intense fragrance. They excel with persistent flowering from early summer until first frost. All varieties are extremely healthy and hardy. Varieties of the National Parks® Collection are suitable for containers and for flower borders.

Easy and quick cultivation process

A delivery time of at least 15 weeks should be considered.

Moderns
fragrant
bouquet roses

The Cottage® Collection

Cottage® roses have small single or half-full flowers. Their intense and colourful flowering continues throughout the summer months. The plant produces decorative and colourful hips in the autumn. All varieties have differently coloured rose hips – yellow, green, orange etc. The rose hip branches are ideal for making winter decorations. The plants are healthy and hardy. The roses are easy to prune with a hedge trimmer. The plants are suitable for quick coverage of large beds in parks and gardens. Three to four plants quickly cover a square metre, and they require very little maintenance.

Easy and quick cultivation process

Delivery time of at least 15 weeks should be considered.

Why Young Plants from Nolina

- Nolina supplies you with the latest and very best varieties from Danish breeder Poulsen Roser A/S.
- We offer a wide product range – from indoor miniature roses to outdoor climbing roses and scented roses.
- All our rose varieties can be grown as own-root container roses, from just one cutting.
- We supply cultivation-friendly varieties that are cost-effective to grow.
- The cultivation process is easy, quick and the growing manuals are user-friendly.
- Our roses are of an exceptionally high quality and hardiness – which guarantees an outstanding post harvest life throughout the supply chain: from cultivation, through transport, at the retail and finally to the consumer.
- Nolina delivers top quality products supplied by professional brokers located in most parts of the world.

The Boulevard® Collection

Boulevard® clematis are compact middle sized plants with repeat flowering from early spring to late summer. They grow to 1-1,5 meter tall. They can be enjoyed indoors as any other flowering pot plant and later be planted outside. The clematis flower from the leaf axils and the ends of the stems, resulting in flowers right from the ground. Boulevard® clematis are ideal for growing in big pots on the patio. They are very decorative in any patio or terrace.

A delivery time of at least 44 weeks should be considered or check our stocklist.

Cuttings produced in 10.5 cm pots

- One cutting per pot
- 2 x pinched
- Delivery in 15 holes Mara transport trays
- 660 plants per CC (44 x 15)

Finishing potsize 17-23 cm

Clematis with
repeat flowering

The Boulevard Evergreen® Collection

Evergreen Clematis Boulevard® are compact middle sized plants. They grow 150-200 cm tall with a very abundant flowering from early spring to early summer. These special clematis are evergreen and will show flowers right from the ground to the top. The clematis are very vigorous, healthy, hardy and easy grown. They should not be pruned as flower occurs on last year growth. Just remove damaged foliage in the spring. Boulevard® Evergreen clematis are ideal for growing in containers placed on the patio or in the flower bed or rockery bed or up against pergolas, trees or walls.

A delivery time of at least 44 weeks should be considered or check our stocklist.

Cuttings produced in 10.5 cm pots

- One cutting per pot
- Delivery in 15 holes Mara transport trays
- 660 plants per CC (44 x 15)

Finishing potsize 19-23 cm

Clematis with a very abundant flowering

The Garland® Collection

Garland® is an exciting and unusual collection of clematis for indoors and outdoors. The varieties in the Garland® collection are rich flowering. They are repeat flowering from early summer to the frost stops them. They come in a range of colours and are grown on a bow, which is an ideal way of displaying their numerous beautiful flowers. The clematis will flower indoors in early winter for up to 8 weeks before becoming ready to plant outside later in spring.- They can become 200 -300 cm tall. v clematis can, besides being a pot plant, also be planted outside. It is very good as a patio plant in pots growing up against a bamboo tipi (3 sticks together). It is good with other plantings where it will crawl and find its way and show the flowers.

A delivery time of at least 44 weeks should be considered or check our stocklist.

Cuttings produced in 10.5 cm pots

- One cutting per pot
- Delivery in 15 holes Mara transport trays
- 660 plants per CC (44 x 15)

Finishing potsize 15-23 cm

Beautiful cascades of flowers

The Paillette® Collection

Paillette® clematis are versatile decorative plants. They can be used in house as flowering pot plants. They can be used as your own cut flower garden as they have a very good stem and a very good lasting quality in the vase. Together with other flowers they make beautiful bouquets with their bell shaped flowers and attractive leaves Paillette® clematis may be planted in pots and tops, in small beds or in the rockery garden.

A delivery time of at least 44 weeks should be considered or check our stocklist.

The Rolls Royce of ground covering plants

The Regal® Collection

Regal® clematis have the most 'out of this world' flowers. They have beautiful double flowers. The flowering period is long - from late spring until autumn. During flowering, they give double or semi-double flowers, which is rare for clematis. Regal® clematis can be grown on trellises and pergolas or in pots on the patio or balcony.

A delivery time of at least 44 weeks should be considered or check our stocklist.
